THE BENEFITS OF LIVING WITH TERRACES AND NEAR THE SEA

The circumstances arising from the current pandemic have led to a major change in the real estate sector, leading to a notable increase in the demand for homes away from the big cities, providing people with the chance to enjoy open spaces with natural light.

In this sense, Gran Canet has observed a considerable increase in interest for the homes with big terraces, sea views and large spaces to make working from home more agreeable, some of the key aspects of demand for property today, making Gran Canet stand out from other developments.
